Medical consultant to be in charge of the section of for the psychoses and double diagnoses, Vordingborg Psychiatric Hospital - 1 impiego

Danimarca (DK) 25 giorno(i) fa (15/11/2018)

Would you love to be part of a treatment team that makes a difference every day in the lives of particularly vulnerable people? Do you feel comfortable making decisions in complex patient treatment courses? Then you are the one we are looking for! We are looking for a medical consultant to be in charge of the section for psychoses and double diagnoses.

Welcome to Psychiatry South:

Our psychiatric hospital is located in the town of Vordingborg in idyllic surroundings close to the shore - just 240 km from Hamburg and 100 km from Copenhagen. South Zealand offers historically low property prices and good possibilities for both buying and renting. There is a wide range of public schools, small rural independent schools and large urban independent schools.

We have a modern hospital organisation that offers examination, treatment and care for people with mental illnesses. We are part of a combined health service in which the interaction with municipalities, general practitioners, patient organisations, patients and relatives is central. We see our patients as partners, and so the management style is adjusted accordingly to ensure it adds value to this relationship.

We have 77 beds. The section is characterised by an open, informal and adaptable culture with a great team spirit, solidarity and interdisciplinary task solution. We have a strong desire and willingness to develop and improve. This translates, among other things, into a high degree of involvement and sparring between professional groups, sections and other units. We have for some time been working intensively to reduce the use of force, which has resulted in record low use of force and an improved work environment. We are looking for someone who wants to collaborate with the head nurse and the rest of the staff in presenting ideas for the continued development and to uncompromisingly manage the treatment at the highest professional level.

For further information, please contact senior medical consultant, PhD Dorthe Goldschmidt, tel. 51 33 38 62, dgo@regionsjaelland.dk, or senior head nurse, MPG Mia Hesselberg Nielsen, tel. 51 51 23 14.
