# Medical Consultant for the x-ray and scanning, Radiology Department, Nykøbing F. Hospital - 1 impiego

Danimarca (DK) 7 giorno(i) fa (03/12/2018)

Nykøbing F. Hospital is one of Region Zealand's acute hospitals with an x-ray department that actively participates in the diagnosis and treatment of acute and planned patients at the hospital in collaboration with the primary sector. The department's catchment area covers approx. 150,000 inhabitants.

The core tasks of the Radiology Department include dialogue and conferences with clinicians, execution and optimisation of Diagnostic Imaging examinations, clinical image analysis and assessment, and subsequent conferral with referring specialists in diagnostic and image-guided procedures. We carry out acute and elective diagnostics, monitoring and intervening treatments for both adults and children.

The department has an activity with a total of approx. 48,600 conventional x-ray examinations performed each year., and a total of approx. 25,000 scans (MRI, CT and UL) are performed each year. The department has two CT-scanners and two MR-scanners as well as two ultrasound instruments. The staff consists of 58 people in total - 8 staff specialists, 2 registrars in training, 9 medical secretaries, 39 radiographers/healthcare professionals.

The department continuously has focus on the development of patient's continuity of care, quality assurance and education within the departments various disciplines including training of junior doctors studying for their introductory and main medical degree. It is possible to undertake research as well.

#### We offer

- A position of 37 hours per week with varying shifts and the opportunity to set up a workstation at home
- You will be able to work along the entire spectrum of radiology during your working day and will be particularly involved in diagnostic examinations relating to trauma and acute patients
- Specific subject areas - e.g., CT-scanning of acute patients, MRI and Ultrasound scanning
- Possibility of designing your own specific subject area as well as influence on your working day
- A department and a hospital with a good interdisciplinary collaboration
- A department that is developing and has a constant focus on quality, a high degree of professionalism and patient involvement, including competency development for you

#### Your professional profile

- You are a specialist in radiology
- You have broad experience and qualifications within the field of radiolog
- You have an interest in research, which can benefit the Radiology Department

#### Your personal profile

- You have a desire to develop professionally
- You are dedicated, ambitious and structured
- You are able to be a motivating colleague who takes responsibility
- You inspire, initiate and continuously manage your professional development
- You are resilient and good at interdisciplinary cooperation

#### About the hospital - together we create a strong acute hospital

The basis for Nykøbing Hospital are the fundamental values: taking care of the patient, taking care of the economy and taking care of one another. These values are visible in a high degree patient and employee involvement.

Our hospital is recognised for being at the forefront when it comes to developing new

forms of organisation and collaboration with a focus on spearheading functions, particularly within the areas of comorbidity and cross-sectorial initiatives. Nykøbing Falster Hospital is an attractive workplace that considers educational training and professionalism, as being of great importance, just as well as research is a prioritized part of the interdisciplinary cooperation. We are located overlooking beautiful natural surroundings.
